

# Resume

edition: 2022-12-11 13:21:14  
rev: 38

(if document older than month – consider I  
don't looking for job for now)

[animuspexusagutilities@gmail.com](mailto:animuspexusagutilities@gmail.com)

## what I can

primarily – backend and, possibly, system development (operating systems). in order of my preference and expertise.

- Go – backend. possibly frontend with WebAssembly
- D – backend
- C++ – can use it for backend or system development. low on experience
- C – same as C++
- Rust – can use it for backend or system development. low on experience
- Python – system or backend programming
- Java – have experience in GUI apps programming

## background

in 2009 – 2013 developed sites with php: drupal, phpbb and postgres, mysql. also used js.

2013 – 2016 used python for backend, system and GUI (Gtk+3) programming.

from 2016 – used Go for system programming: operating system development.

have stalled Linux distribution development project. it can be found here:

<https://github.com/AnimusPEXUS/aipsetup>. used Python and Go for package manager development.

from 2018 till 2022 developed fast commercial western news server, using Go.

## about me

35 yo. single. no kids. constantly living in Simferopol.

working only remotely.

my github profile is here: <https://github.com/AnimusPEXUS>
